TECHNICAL TRAINING

We offer comprehensive training courses to build the knowledge required for certification. Our training is offered at our site, on your site, or online.

We now offer the entire Licensed Penetration Tester (LPT) track. Taught by a world renowned hacking instructor, this track covers the Certified Ethical Hacker (CEH) and the EC-Council Certified Security Analyst (ECSA),

DIGITAL FORENSICS

Computer forensics is becoming an increasingly important part of doing business. We offer expertise in incident response, e-discovery, digital forensics, and litigation support. Our certified personnel have experience working with events ranging from corporate espionage to international cyber extortion...

ETHICAL HACKING

Red Team penetration testing capability is available with a wide range of focus. Our services range from PCI compliance to physical, cyber, & procedural security validation. The goal of this service is to emulate adversaries, test the current state of security in your organization, and report weaknesses along with providing solutions to mitigate those risks.

WE'VE WORKED WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
